

One graphic novel you'll have a hard time finding in stores is the recent release of Warren Ellis and D'Israeli's new graphic novella SVK. The graphic novel is about a futuristic surveillance state — comes with a black light reader to read dialogue printed in invisible ink. According to the publisher, "SVK is a modern detective story, one that Ellis describes as 'Franz Kafka's Bourne Identity.' " You can order it direct from the publisher , but be advised that it's not super-cheap to ship out of England. SVK is out right now. Berg CEO Matt Webb on the plot: The noir tale follows a detective who must retrieve a technology called SVK (Special Viewing Kit). When the sleuth discovers its telepathic functions, the reader learns how to brain-snoop too. "You use the torch to unlock another player of the story," says Matt Jones, 38, a principal designer at BERG. "A bit
