Peabody and Sherman will be focusing on the cartoon characters origin, as well as the time-traveling stuff they normally do. Peabody is the highly-intelligent dog who helps the boy Sherman, traveling through time using the WABAC (pronounced "Wayback") Machine. The Lion King director Rob Minkoff is helming the movie project and said this about the 3D animated adaptation: "Mr. Peabody is this genetic anomaly. He does have brothers and sisters, all of them non-speaking, no super-smart dogs. He's an outcast, but has overcome it by being so great at so many things." Peabody and Sherman's script is from screenwriters Jeffrey Ventimilia and Joshua Sternin (Yogi Bear). LEEE777 - This will not be another CGI/live-action film, this will be a fully computer animated movie by DreamWorks Animation films in 3D.
