In 1982 sci-fi fans were treated with arguably the greatest special effects based movie in the form of TRON. The film starred Jeff Bridges, Bruce Boxleitner and David Warner. It went on to be a cult success for almost Thirty years before the highly wanted sequel, TRON: Legacy made its way to the silver screen in December of 2010. TRON: Legacy was a huge stepping stone for a possible franchise to start from a movie made twenty-eight years prior. Disney of course remained confident in the film giving it an insanely high budget of 200 million dollars. The film went on to gross over 300 million world wide(so far) and a sequel is seeming more and more possible, even with the mediocre reviews. A TRON fan page known as TRON-SECTOR are reporting that not only is a sequel on its way but that a teaser trailer should surface
